

Leaders for Conferences and Events

CONGRESS RENTAL

The Leading and Largest Supplier of Simultaneous Interpretation Rental Services

Congress Rental offers the latest technologies from Bosch to support corporate events, conferences, multi-language meetings and events. Our products and services include:

- Simultaneous Interpretation
- Remote Interpretation & Online Video Interpreting
- Silent Conference
- Conference Microphones
- Dome Camera integration with Conference Microphones
- Tour Guide Systems & Personal Hearing Loops
- Voting / Audience Response

Our goal is to ensure the perfect customer experience, to provide a quality solution for your congress, conference, event or installation. We provide the best Bosch interpretation equipment, Audipack booths and industry-experienced staff, trained and certified through Bosch.

Being Australia and Asia-Pacific's largest and leading supplier, we operate successfully with offices in Australia (1975), Singapore (2005), Indonesia (2017), New Zealand (2018), as well as throughout Asia Pacific, using only the latest equipment and continually investing in new systems and technologies.

SIMULTANEOUS INTERPRETATION

Our equipment and qualified team will ensure your event experience is faultless.

To guarantee that your conference is uninterrupted, we only supply the world standard in ISO-compliant interpreter booths. They feature soundproofing to provide delegates with a distraction-free environment and a well-ventilated space to offer interpreters a pleasant work area. They can be configured to fit two interpreters (1.8m x 1.8m) or three interpreters (2.4m x 1.8m).

Our receivers are digital, which ensures that they are 100% interference-free, guaranteeing every delegate has perfect audio. Our infrared radiators provide superior signal coverage. We carefully calculate the number required, based on the number of channels and the required area to ensure maximum efficiency.

We work closely with high-level interpreters on a daily basis, which has allowed us to develop great relationships with interpreters across the globe. If required, we can assist you in sourcing the right interpreters with a background in your event topic.

CONFERENCE MICROPHONE SYSTEMS

Conference microphones are for all your interactive discussion needs. Each conference microphone unit includes an on/off button and a built-in loudspeaker. Also known as push-to-talk mics, they eliminate the problems of noise and feedback that exist with conventional microphones.

Each of our systems can integrate with your video or teleconference system, as well as our PTZ cameras (see page 9). Our microphones are ideal for use in small boardrooms, medium-sized meeting rooms and conferences with 200+ people.

They have been used for major international conferences, bi-lateral trade negotiations and many government meetings. The applications are endless and can be applied to any situation where an interactive discussion is required.

NFC cards can also be utilised to allow delegates to move around freely between microphones. Each card has a unique identification chip that, when activated, displays the delegates name on the speaker list. Other participants will immediately know who is speaking independent of their location.

DCN Multimedia Conference Microphones – For when you have multimedia content

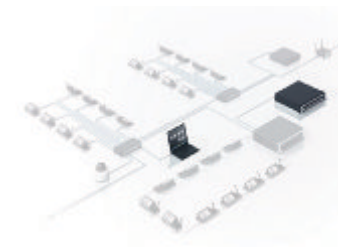

DICENTIS Wireless Microphones - For when you can't run cables

DCNNG Wired Discussion Microphones – High quality cross hire, microphone management and dome camera integration

CCS1000 Discussion Microphones – Standard Cross Hire Microphone

NFC Card - DICENTIS identification at seat

TOUR GUIDE / WHISPER SYSTEMS

Our digital system is the most versatile and advanced wireless listening system available.

Ideal for:

- Whispered simultaneous interpretation
- Tour group communications
- The hearing impaired

Simultaneous Language Interpretation

The interpreter listens to the speaker through ambient audio and whispers the interpretation through a transmitter to delegates with a receiver. Ideal for mobile interpretation situations.

Tour Guide Communication

Tour groups soon get bored and distracted when they can't hear the presentation. Our tour guide system ensures your guests can listen to everything. It saves your tour guide's voice, keeps the presentation private and from disturbing others since only those with receivers & headsets can hear the tour.

Personal Hearing Loops

The personal hearing loop is a wireless, portable audio transmission system, in which clear digital audio is delivered via a tele coil-compatible assistive listening device to enhance the delegate's hearing. It is easy to use, cost-effective and can be used for events of all sizes with any number of delegates.

AUDIENCE RESPONSE & VOTING SOFTWARE

Audience response systems allow members of your audience to become active participants. The system facilitates a relationship between a presenter and their audience. It encourages conversation, active participation, sharing of knowledge, gathering of information and decision-making.

- You choose the device - keypad, smartphone or tablet
- Polls can be anonymous or tracked.
- Real-time polling results can be displayed immediately.
- Factual data reports are produced, displaying rich data

As experts in the field, we work with you to determine the right solution for your audience and then craft questions to reach your desired event outcome. Our solutions have been used for education, quizzes, corporate training, market research, trivia game shows and AGMs.

Keypad Provided Solution

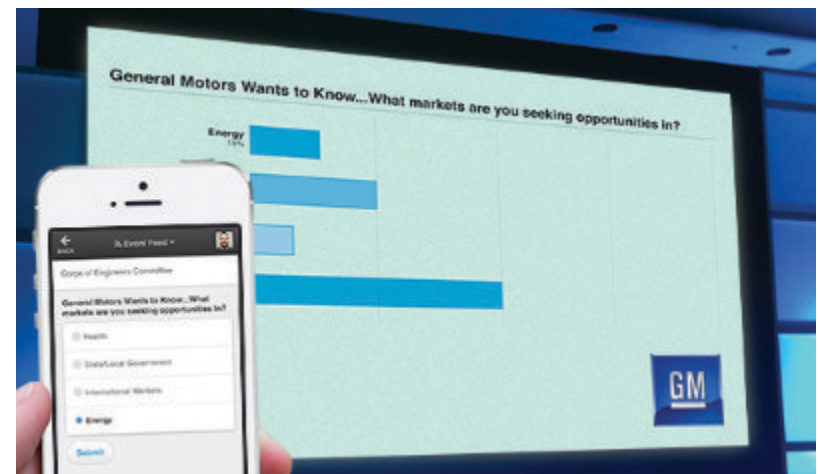

The keypad solution is perfect for an audience that requires a simple and straightforward method of participating in the event. Remove the time required to connect to an online platform by giving delegates a hand-held device that allows immediate participation. This solution offers customisable multiple choice functionalities that provide you with rich quantitative data.

Simple Smartphone Solution

With an online audience response system, your options are only limited by your imagination! Choose from a broad selection of engaging formats such as word clouds, diverse use of images and fully interactive audience Q&A. All the audience requires is the phone in their pocket.

Keypad Voting Solution

REMOTE INTERPRETATION

With the increasing demand for cost-effective and flexible solutions for conferences and events, Remote Interpretation is transforming the Interpretation industry. Congress Rental's iRemote platform allows interpreters to work from any location in the World, not just in the venue. Delegates access the interpretation via a smartphone, tablet or computer, select their language and enjoy the event.

Congress Rental technicians work closely with your team and the interpreters to provide a quality solution, suited to your event requirements. This solution can be customised to a full cloud solution or a hybrid system through the use of infrared equipment to provide more superior sound quality.

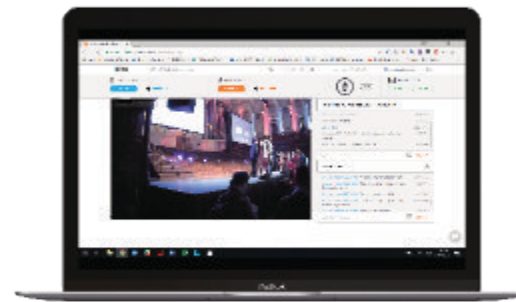

Benefits of Remote Interpretation:

- Access high-quality interpreters from anywhere in the World
- New opportunities for interpretation in small groups, meetings, seminars and conferences
- Save on interpreters travel and hotel expenses
- Flexibility to work at short notice and with rare languages
- New access to venues where there is no space for booths or at difficult-to-reach locations
- Accessed anywhere in the World - without a VPN, including China

Video Conferencing Interpretation

Video Conferencing is well established, with many providers including GoToMeeting, Adobe Connect, Skype for Business, Google Hangouts, Zoom, BlueJeans and more. Congress Rental's iRemote platform now allows you to add Interpretation to any of these video conference platforms. Conference Interpreters listen and watch the videoconference stream on our iRemote platform, providing the Interpretation to participants through iRemote on their laptop/Mac, tablet or smartphone.

As well as integrating with existing video conference platforms, the iRemote platform is a standalone solution for clients looking for an entirely integrated Interpretation language focused solution. For larger groups, chairman functionality can be added to ensure audio quality is maintained by managing the number of participants contributions. Audio and Video quality can be further enhanced with the integration of Congress Rental's Conference Microphones and HD Cameras.

SILENT CONFERENCE

Silent Conference allows multiple presentations to take place simultaneously in a space without noise interference.

Breakout rooms are a thing of the past, and with the increasing demand for engaging events, Silent Conference is the perfect solution. From a silent theatre space in the middle of a noisy exhibition to dividing a thousand-person plenary instantly into breakout groups, we can support events of all sizes.

Delegates can move between areas and use their digital receiver to listen to the various presentations. Infrared multi-channel distribution allows up to 32 channels of audio transmission simultaneously. Each participant carries a receiver and headphone and selects their desired channel.

Silent Conference set up in 6 breakouts

CAMERA INTEGRATION & SOFTWARE CONTROL

Conference Microphone Video Integration

Our conference microphones can be integrated with our broadcast-quality Camera Systems to create an automated video experience. When the conference microphone is activated, the camera automatically rotates to the position of the speaker and the captured video is displayed on the screen.

This is ideal for large meetings where you cannot directly see all participants or if remote video of the event is required.

Software Control and Queuing

Our microphone systems utilise a PC-based software queuing system and integrates seamlessly with one or more cameras.

The queuing system can be used with allocated seating to associate a name with a microphone or ID cards can be coded with a delegates details, allowing them to sit anywhere. The chairman can then select the next speaker from a clear list of delegates requesting to speak.

Software Control & Queuing

QUALITY SOLUTIONS

Building on true world-class expertise, CongressRental has led the conference market for over 20 years. How? By guaranteeing your experience is the best it can be, from start to finish. Our end-to-end process has been refined to deliver professional service often sought, but rarely found.

We are specialists in this field and can advise you on all aspects relating to conference solutions. Our team has expert knowledge and will guide you through all available options to find your ideal solution, as we pride ourselves on communication and dedication to your event's success.

We interface with your preferred audio visual supplier and liaise directly with onsite contacts to manage all logistics – delivery, installation, operation and bump out – providing you with peace of mind.

Our Technicians are rigorously trained and qualified through Bosch, at an expert level. Their problem solving and agile thinking skills ensures a trouble-free event.

For when your event can't fail, use Congress Rental.

PARTNERS AND TESTIMONIALS

G20 Leaders Summit Brisbane 2014

The G20 Leaders' Summit brought together 34 leaders and 5,300 delegates from across the world for an event that depended on easy communications across 14 languages. Congress Rental provided interpretation equipment for use at three venues at the G20 Leaders' Summit, held in Brisbane on 15-16 November 2014. Congress delivered the equipment under tight constraints and worked tirelessly to ensure the equipment was delivered and installed on time. The systems performed perfectly at each venue, playing a crucial role in the success of the event. CEO Jeremy Ducklin and his team understood the requirements for interpretation systems from the perspectives of customers and interpreters, ensuring a flawless performance for the G20 Leaders' Summit.

— Chris Christoff, ICT Project and Operations Manager, G20 Taskforce

ASEAN-Australia Special Summit Sydney 2018

The efforts of Congress over the ASEAN-Australia Special Summit event weekend have not gone unnoticed and I have continually received nothing less than complete admiration and the highest appreciation for the way simultaneous interpretation services were managed and performance and quality of the attending Congress staff. I would personally like to congratulate Congress for another extremely successful engagement with PM&C. Well done and thank you all once again.

— Chris Jackson, ASEAN-Australia Special Summit 2018 Taskforce

Congress is an active member of the International Congress Rental Network - individual companies tied together with the common purpose of providing high-quality services using Bosch equipment. Being a member enables us to tackle events of any size, knowing we will have support from our partner companies. Congress Rental Australia won International Member of the Year in 2016 and, Bosch Member of the year in 2018.

Bosch is the largest supplier of Congress equipment globally. We are proud to rent and sell Bosch equipment.

- Bosch has many levels of conference microphone systems, each one exactly meeting a particular market requirement.
- Bosch conference solutions are used by all kinds of customers, ranging from small-sized organisations to multinational corporations, as well as local, regional and national governments and international summits.

The Congress Rental team have been providing simultaneous interpretation rental services for 20 years. The team has provided microphones and simultaneous interpretation equipment for the following events:

- G20 in Australia in 2014 - All Finance Ministers Meetings and All Leaders Meetings in Brisbane.
- ASEAN - Australia Special Summit, Sydney, 2018.
- Asian Development Bank Annual Meeting, Fiji 2019.
- Fiji Asia Pacific Parliamentary Forum , 2017.
- ICANN64 Leaders Meeting, in Kobe, Japan 2019.
- Nuskin in Singapore, 2014.
- Global Summit of Women in Sydney, Australia 2018.
- Olympic Games in Sydney Sept/Oct 2000.
- 33rd ASEAN Summit and Related Summits in Singapore, 2018.
- 68th Session of the World Health Organisation
