# Transport World

What began in a back shed has been transformed into something truly spectacular. Transport entrepreneur Bill Richardson poured decades of passion into restoring trucks, and he took great pride in showing people his collection as it grew.

The spark of an idea formed, and in late 2015 Bill Richardson Transport World – the largest private automotive museum of its type in the world, boasting more than 300 spectacular classic vehicles – was opened to the public.

With interactive fun zones for kids and the Grille Cafe, Invercargill's fresh take on American diner classics, a day of family fun awaits.

Our team is the best option to get you there and back in comfort.
