

# PACIFIC DIVERS - Tank Dives Rarotonga

Experience the magic of the Pacific Ocean and enjoy the beautiful unspoiled coral reefs of Rarotonga in the Tank Dives. Trips operate daily and are restricted to certified divers only.

Rarotonga's reef is home to many stunning dive sites, with much to see, including coral gardens, colourful fish and moray eels. If you're lucky you might even catch a glimpse of green or hawksbill turtles, reef sharks and eagle rays.

Dive spots vary in depth and characteristics, where you dive determines what you can expect to see. One thing is certain; no matter where you dive, you are always guaranteed to see something extraordinary.

Rates include a guided dive for all divers, with the option to book with equipment included or to bring your own gear.

Night dives are also available on request and include all the necessary equipment.

## TOUR HIGHLIGHTS

### Great Diving Spots & Unlimited Time

Diving over the reef is a highlight itself and is one of the greatest things one can experience. With many sites at your disposal, you are almost always guaranteed a spectacular dive.

### Safety First

Pacific Divers have taken all the necessary requirements to ensure that your safety is taken seriously. All safety equipment is provided and staff are all fully trained in equipment use and first aid.

# PACIFIC DIVERS - PADI Dive Courses

Rarotonga

The fantastic team at Pacific Divers offer a comprehensive and wide range of diving trips to cater to all skill levels.

The PADI Dive Courses include the Discover Scuba Dive, which is suitable for non-certified divers. This is a great option for absolute beginners.

At Pacific Divers they understand that taking your first breath underwater is a thrilling adventure and your instructor is there to ensure you have the best experience possible. Groups are kept at a max of 4 students per dive instructor.

The Discover Scuba Dive offers an introductory lesson into diving, where you learn how to use scuba along with other diving equipment. You will be taught the diving basics - enough to be able to dive confidently under the supervision of your instructor.

Once you are comfortable using scuba, you will head out over the reef, where you will be enchanted by the variety of marine life our ocean has to offer.

Please note that light refreshments are not included.
